

SM-936A+ ANTI-STATIC SOLDERING STATION

- Built of conductive materials, complete anti-static design
- The heater uses low voltage DC power supply to ensure separation from the main power and non-leakage, non-interference and anti-static
- Constant temperature control with lock to avoid indiscriminate adjust
- Advanced and long-life heater element
- Wide range for different application

Technical specifications

Power consumption: 60W

Output voltage: AC 24V

Temperature range: 200°C~480°C

Display mode: scale indication

Grounding resistance: <math>< 2 \Omega</math>

Drain voltage: <math>< 0.5\text{mV}</math>

Dimensions: 155x113x92mm

Weight: 1.58kgs

REF: 160936A0000

CE (EMC), UL, CE (LVD)

Sinometer
